

Made by Fans, for Fans

As baseball fans, we love to compare the stats of our favorite players to determine who's the best. MoneyBaller is our attempt to incorporate those same stats into a fun game for other baseball fans to enjoy

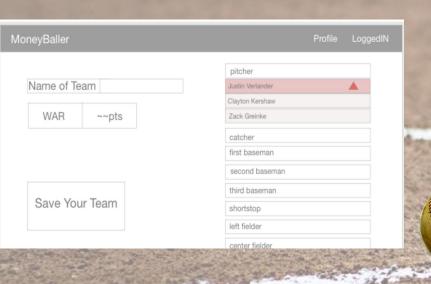

What is the Concept?

MoneyBaller is a simple baseball stat game where the user drafts a team of current and former baseball stars, with the score being determined by the career WAR stats of the players chosen.

What is WAR?

WAR stands for "Wins Above Replacement" and is a metric of individual contribution towards winning. For example, a player with 5 WAR has added 5 more wins to a team's overall record than the average player at that same position..

Trouble on the Base Path

Our initial concept proved to be too lofty to accomplish within one week, but we were able to regroup ourselves and finish a minimum viable product that we are eager to build upon.

The New Kid

In our MVP, we shortened the overall pool of players, limited teams to 3 positions instead of 9, and associated 1 WAR score with each player instead of a range
